MachineLearning,Pandas,Seaborn

Database:

SQL

EDUCATION

Computer Programming

Izmir University of Economics
(2023-Present)

LANGUAGE

English (B1 - Intermediate)

PROFILE

My experiences in software development processes have honed my ability to provide practical solutions to complex problems and swiftly adapt to diverse work disciplines. I continuously keep myself updated with an approach focused on exploring new technologies. With the collaborative experience and solution-oriented mindset I have gained across various projects, I believe I can add tangible value to any professional team I join.

PROJECTS

MechMind

2026

Predictive Maintenance System

- A research and data analysis project aimed at detecting hardware failures in advance using machine sensor data.
- GitHub: <https://github.com/kuzeyisleyen/predictive-maintenance-ml>

kuzeyisleyen.com

2026

Personal Portfolio Website

- A responsive website designed and deployed to professionally showcase my projects, technical skills, and resume.
- Technologies Used: HTML, CSS, JavaScript
- Link: <https://kuzeyisleyen.com/>

HubSpace

2026

Rental Management Automation

- Desktop application developed for workspace management and rental processes.
- Tracked rental statuses through the integration of C# Windows Forms and an SQL database.
- GitHub: <https://github.com/kuzeyisleyen/HubSpace>

ToDoList

2026

Task Management Application

- Cross-platform (iOS/Android) mobile application enabling users to plan, track, and manage their daily tasks.
- Integrated task creation, deletion, and status update features with a user-friendly interface design
- Technologies Used: React Native
- GitHub: <https://github.com/kuzeyisleyen/ToDoList>
